Product Specification Sheet

Targus HeatDefense™ for Laptops

Part #: AWE45US

Product Description:

The Targus HeatDefense™ for Laptops serves as a barrier that shields your office furniture and lap from high heat generated by laptops. A crystalline compound absorbs heat by turning into a soft gel, keeping the laptop running cool to help prolong battery life. Once the heat is removed, the gel turns back into crystals and is ready for use again. No fans or power are required to operate which provides a highly portable, quiet laptop cooling solution.

Product Features and Specifications:

- **Functionality** – Heat barrier shields furniture and lap from laptop heat; helps prolong battery life
- **Unique Heat Absorption** – Special crystals absorb heat by turning into a soft gel. Once heat is removed, gel turns back into crystals and is ready for next use
- **Passive Cooling Pad** – No fans or power required for a quiet work environment
- **RoHS Compliant** – N/A
- **Compatibility** – Designed for 12" – 17" laptops
